

Combining The Best in Performance and Sensitivity At Your Benchtop

Unmatched Qualitative and Quantitative Results from a Single LC-MS Analysis

- Sub-ppm Mass Accuracy and 40,000 Full Sensitivity Resolution
- Extraordinarily Sensitive Across the Entire Mass Range from Very Small Molecules up to Intact Proteins
- High Speed MS/MS Capability with Full UHPLC Compatibility
- Simultaneous Analysis of Major and Trace Sample Components
- Isotopic Fidelity for Definitive Molecular Formulae Determination
- Robust and Easy to Operate
