*Our ability to meet
and exceed the
expectations of our
pharmaceutical clients
is directly tied to
the expertise and
responsiveness
of our staff.*

JIM WILFAHRT,
General Manager

Tandem Labs provides large- and small-molecule GLP-compliant bioanalytical services for drugs, metabolites, and biomarkers in a variety of matrices for discovery, pre-clinical, and clinical studies.

Collectively, the Tandem Labs locations provide a wide range of bioanalytical and biotechnology services. We understand that bringing new drugs to market quickly is more challenging than ever in today's environment. We recognize the pressures to do more with less. That's why at Tandem Labs, we take pride in not only delivering high-quality bioanalytical work, but also in doing everything we can to make your job easier – including timely communications; structured method development for more rugged methods and improved ISR results; reliable, accurate bioanalytical data; and meeting deadlines.

We employ the highest standards of service, data integrity, and timeliness. Since 1994, our quality assurance systems have withstood the scrutiny of industry and regulatory authorities through hundreds of audits.

Stop by our booth to learn how Tandem Labs can help you today!
