

CPSA Session: Innovation Boot Camp

Session Chairs: Lucinda Cohen and Tim Olah

This highly interactive workshop will take participants through a series of exercises designed to enhance their ability to gather information, brain storm, methodically solve problems and communicate these solutions effectively to others. A combination of case studies and real life examples of challenges encountered in scientific research will be utilized to guide the discussion. Active participation will be a critical requirement, with both small and large group discussions throughout the workshop. Anyone interested in attending should come prepared to discuss a scientific challenge that they are facing. Session participants will include scientists working in a range of environments including pharmaceutical research, contract research organizations and instrument vendors.
